A COMPLETE SOLUTION

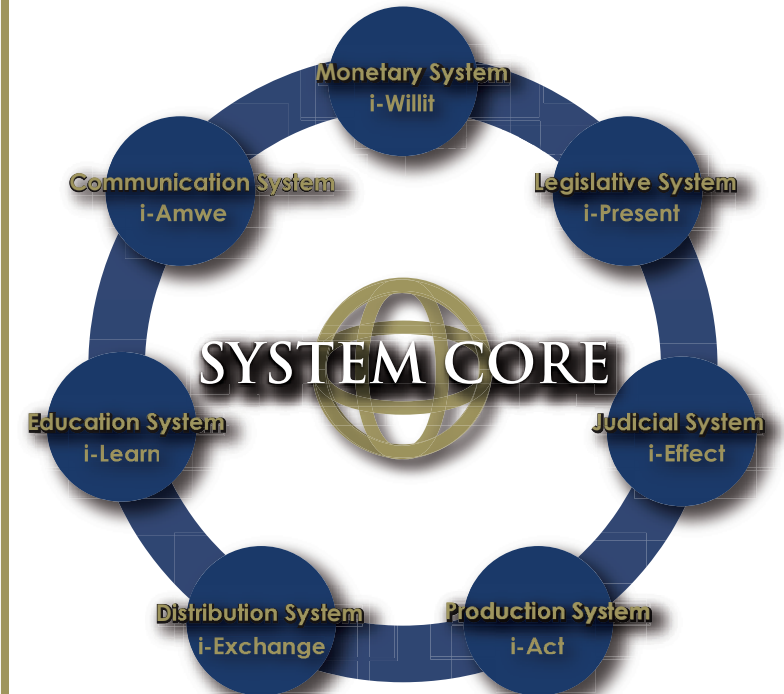

Advancian's strategic plan is a comprehensive, multifaceted, non-fractional, social and economic solution for systemic evolution. We are merging the best aspects, ideologies, and processes of capitalism, democracy, and socialism to create a world that is equitable, where people are fairly rewarded for the energy they put forth, to ensure the permanent end of poverty and injustice in all its forms for all people.

1. Our Dual Monetary System makes use of Earned Equity for standard needs provision and money for Capital Markets.
2. The Earned Equity System interlaces with Labor Management Systems to ensure all people have access to the Standard Needs for life; ensures 100 percent employment of all able-bodied persons, which reduces work hour requirements to ensure people have time to care for themselves and parents can properly raise and educate their children, which will help to revitalize communities. The Standard Needs Earned Equity System also secures an individual's retirement and prevents the debt burden of retirement accounts upon cities, states, governments, unions, and corporations.
3. Our Global Monetary Standards make use of thirteen factors to stabilize the creation of money, and ensures the value of money globally without need of monetary policy manipulation. Through interlinked National and Global Compensation and Transaction Administrations (GCTA), the equitable payment of compensation is ensured regardless of gender, nationality, or ethnicity/race – which ensures the end of low wage slavery, stolen wages, and the trafficking of people for money. The Willit monetary conversion systems ensure a complete audit of all transferred wealth, reparations for low wage abuses, and, will help to ensure independence and equality between women and men to end exploitation and monetary based dependency that contributes to spousal and child abuse and neglect.
4. Our Dual Monetary System interlaces with our Legislative System, Production Applications, and our 60/30/10 Resource Partition Plan to provide the manpower to produce the products a society determines to be required, based on indigenous materials, and de-production, and recycling resource retrieval.
5. Our Legislative System is interlaced with our Production System and the Standard Needs System so citizens can determine what products are needed, and grant resource acquisition rights to corporations for production through approval of legislative enactments.
6. Corporations are interlaced within the system without having the expense of resource or labor procurement. Thereby, open and fair markets and innovation are ensured, and natural systemic controls are utilized to prevent corporate abuse.

Systemic Reform Movement

We are focused on the development of interdependent social and economic technological systems for:

- Merit Systems to ensure equal employment opportunities
- Equitable compensation systems based on standards that ensure equality of pay regardless of gender, race, or ethnicity
- Earned Equity systems to ensure access to standard needs for all citizens, including health care and education
- Open markets and price stability systems that equally support corporations, small businesses and entrepreneurs
- Legislation approval systems for confirmation by the People of law and judicial rulings
